

Project Design Phase-II
Data Flow Diagram & User Stories

Date	3 october 2026
Team ID	SWTID-2026-6064
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Data Flow Diagrams:

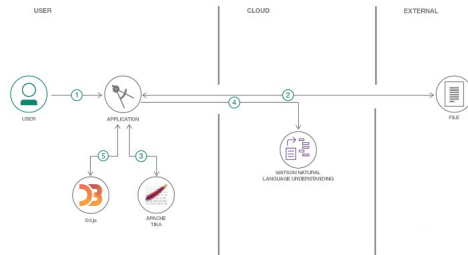

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

DFD Level 0 – Automated Standard Laptop Procurement

Level 0 DFD - Automated Standard Laptop Procurement

Flow

1. User configures credentials for the Watson Natural Language Understanding service and starts the app.
2. User selects data file to process and load.
3. Apache Tika extracts text from the data file.
4. Extracted text is passed to Watson NLU for enrichment.
5. Enriched data is visualized in the UI using the D3.js library.

DFD entities and flows: IT User → ServiceNow Service Catalog → Approval → Flow Designer → Catalog Task → Hardware Team. Request and task information is maintained in the ServiceNow request/task records.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
IT User	Standard Laptop Request	USN-1	As an IT user, I can place a standard laptop request through the Service Catalog.	A standard laptop request can be submitted and a request record is created.	High	Sprint-1
IT User	Standard Laptop Request	USN-2	As an IT user, I can view the status of my standard laptop request.	The request/order status can be viewed in the ServiceNow request record.	High	Sprint-1
IT Procurement	Approval	USN-3	As a member of the IT procurement team, I	The requested item shows	High	Sprint-1

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Team			can process the approval for a standard laptop request.	the approval status and can be approved before task creation.		
IT Procurement Team	Automated Task Creation	USN-4	As a member of the IT procurement team, I want Flow Designer to automatically create a Catalog Task after approval.	After approval, a Catalog Task is created automatically for the requested item.	High	Sprint-1
IT Procurement Team	Task Assignment	USN-5	As a member of the IT procurement team, I want the configuration task to be assigned automatically to the Hardware group.	The Catalog Task has Assignment group set to Hardware.	High	Sprint-1
Hardware Team	Laptop Configuration	USN-6	As a hardware team member, I can receive the standard laptop configuration task.	The Hardware team can see the assigned Catalog Task with the required laptop configuration description.	High	Sprint-1
Hardware Team	Task Tracking	USN-7	As a hardware team member, I can update the status of the laptop configuration task.	The Catalog Task record reflects the current task status.	Medium	Sprint-2
IT Procurement Team	Workflow Automation	USN-8	As an IT procurement team member, I can use the Standard Laptop Task Flow instead of manual task creation.	The Standard Laptop Task Flow is activated and linked to the Standard Laptop service catalog item.	High	Sprint-2
