

Project Design Phase-II Technology Stack (Architecture & Stack)

Date	3 October 2026
Team ID	SWTID-2026-6064
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table1 & table 2

Example: Order processing during pandemics for offline mode

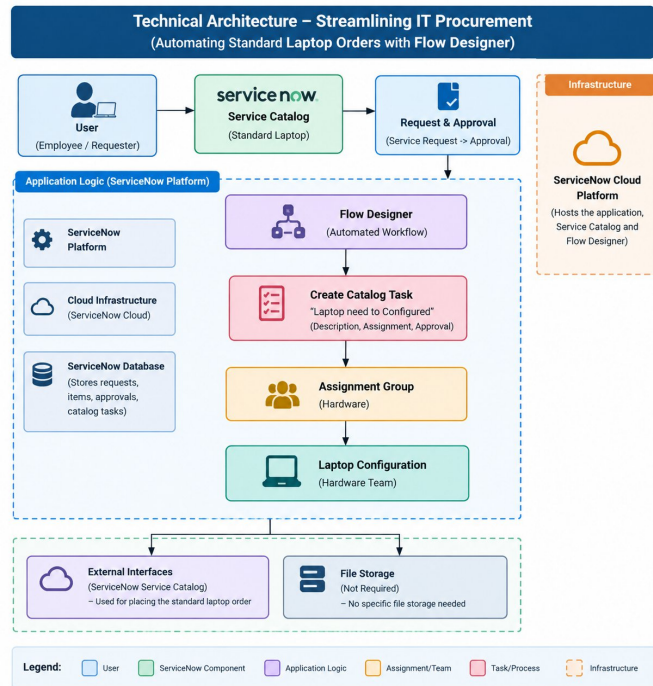

Table-1 : Components & Technologies:

S.No	Component	Description	Technology
1	User Interface	Interface through which users request a standard laptop and place an order.	ServiceNow Service Catalog
2	Application Logic-1	Handles the standard laptop request and approval process.	ServiceNow Service Catalog
3	Application Logic-2	Automatically creates a catalog task after the request is approved.	ServiceNow Flow Designer
4	Application Logic-3	Updates the task details and assigns it to the Hardware team for configuration.	ServiceNow Flow Designer
5	Database	Stores service requests, requested items, approval information and catalog tasks.	ServiceNow Database
6	Cloud Database	Database services supporting the ServiceNow cloud platform.	ServiceNow Platform Database
7	File Storage	No specific file storage is required for the workflow.	ServiceNow Platform Storage
8	External API-1	No external API is required for the standard laptop procurement workflow.	Not Applicable
9	External API-2	No external API is required for the standard laptop procurement workflow.	Not Applicable
10	Machine Learning Model	No machine learning model is used in this project.	Not Applicable
11	Infrastructure (Server / Cloud)	Hosts and executes the ServiceNow application, Service Catalog and Flow Designer workflow.	ServiceNow Cloud Platform

Table-2: Application Characteristics:

S.No	Characteristics	Description	Technology
1.	Open-Source Frameworks	No specific open-source framework is used. The application is implemented using ServiceNow platform capabilities.	ServiceNow Flow Designer
2.	Security	User requests are processed through ServiceNow access and approval mechanisms. Laptop requests require approval before the automated catalog task is created.	ServiceNow Access Control & Approval
3.	Scalable Architecture	The workflow-based architecture can handle standard laptop requests through automated task creation and assignment, reducing manual processing.	ServiceNow Flow Designer
4.	Availability	The application runs on the ServiceNow platform, allowing users and IT teams to access the service workflow through the platform.	ServiceNow Cloud Platform
5.	Performance	Automation reduces manual processing by automatically creating and assigning the configuration task after approval, improving processing time.	ServiceNow Flow Designer
