

Project Design Phase

Problem – Solution Fit Template

Date	3 October 2026
Team ID	SWTID-2026-6064
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ **Understand the existing situation in order to improve it for your target group.**

Template

Define CS, fit into CC	1. CUSTOMER SEGMENT(S) CS	6. CUSTOMER CONSTRAINTS CC	5. AVAILABLE SOLUTIONS AS	Explore AS, differentiate
	- Employees / end users who request a standard laptop through the Service Catalog - IT procurement team who place and approve laptop orders - Hardware team who configure the laptops	- Configuration depends on a manual handoff to the hardware team - Hardware team capacity is limited - Work can start only after the request is approved - Users have no easy way to see configuration progress - Needs ServiceNow access and the right roles	- Emails, calls or chat messages to the hardware team; tasks created by hand - Pros: familiar, no setup needed - Cons: easy to forget, causes delays, no tracking, inconsistent assignment	
Focus on J&P, tap into BE, understand RC	2. JOBS-TO-BE-DONE / PROBLEMS J&P	9. PROBLEM ROOT CAUSE RC	7. BEHAVIOUR BE	Focus on J&P, tap into BE, understand RC
	- Get a standard laptop ordered, approved and configured quickly - Make sure the hardware team gets a configuration task automatically - Reduce manual follow-up and the risk of overlooked tasks - Track the request status from order to configuration	- The configuration step is not linked to the laptop order - Tasks are created and assigned manually, so they are prone to oversight or delay - No automatic routing to the Hardware assignment group - Result: frustrated users and inefficient use of IT resources	- Users place the catalog request and then wait - Procurement team chases the hardware team by email or chat - Users keep checking or following up on the status - Hardware team picks up configuration only when reminded	
Identify strong TR & EM	3. TRIGGERS TR	10. YOUR SOLUTION SL	8.1 CHANNELS of BEHAVIOUR - ONLINE CH	Extract online & offline CH of BE
	- A Standard Laptop request is placed and approved - Users complain about long waiting times - IT management wants less manual work		ONLINE: Order from Service Catalog > Hardware > Standard Laptop; track the request number; approve approves online; hardware team works the catalog task in ServiceNow	
	4. EMOTIONS: BEFORE / AFTER EM		8.2 OFFLINE CH	
	- Before: frustrated, uncertain, tired of chasing - After: confident, in control, relieved that the laptop is configured promptly	- A Flow Designer flow, "Standard Laptop Task", triggered by the Service Catalog - After approval, the Create Catalog Task action creates a task on the Requested Item - Short description: "Laptop need to Configured"; Assignment group: Hardware - Flow attached to the Standard Laptop catalog item through Maintain Items > Process Engine - Outcome: timely, consistent configuration tasks with minimal manual intervention	Calling or visiting the IT desk to ask for status; follow-up emails; physical handover of the configured laptop to the user
