

Project Development Phase Performance Test

Date	3 october 2026
Team ID	SWTID-2026-6064
Project Name	Project - Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Screenshot / Values
1.	Data Rendered	Connected to live ServiceNow IT Service Management data source. Successfully extracted and rendered 10,000+ historical records for hardware requests.
2.	Data Preprocessing	Cleaned raw data by handling missing values in the 'Approval Date' field. Grouped hardware types, aliased obscure status codes into readable text (e.g., '1' to 'Pending'), and changed the 'Fulfillment Time' data type to continuous integer.
3.	Utilization of Filters	Applied a Global Context Filter on the 'Request Year' to improve performance. Added interactive quick filters for 'Department' (Dropdown) and 'Region' (Multi-value list) across all dashboard worksheets.
4.	Calculation fields Used	- Fulfillment Duration: DATEDIFF('day', [Request Date], [Delivery Date]) - SLA Breach Flag: IF [Fulfillment Duration] > 5 THEN "Breached" ELSE "Met" END - Total Hardware Cost: SUM([Unit Price] * [Quantity])
5.	Dashboard design	No of Visualizations / Graphs - 4
6	Story Design	No of Visualizations / Graphs -6
