

## Functional & Performance Testing Template

### Model Performance Test

|               |                                                                                                |
|---------------|------------------------------------------------------------------------------------------------|
| Date          |                                                                                                |
| Team ID       | 6ab8b3c5c23107aaaa72d06e                                                                       |
| Project Name  | Project - Streamlining IT Procurement:<br>Automating Standard Laptop Orders with Flow Designer |
| Maximum Marks |                                                                                                |

### Test Scenarios & Results

| Test Case ID | Scenario (What to test)                                 | Test Steps (How to test)                         | Expected Result                                    | Actual Result                                                         | Pass/Fail |
|--------------|---------------------------------------------------------|--------------------------------------------------|----------------------------------------------------|-----------------------------------------------------------------------|-----------|
| FT-01        | Text Input Validation (e.g., topic, job title)          | Enter valid and invalid text in input fields     | Valid inputs accepted, errors for invalid inputs   | Inputs parsed and accepted correctly. Errors thrown for invalid types | Pass      |
| FT-02        | Number Input Validation (e.g., word count, size, rooms) | Enter numbers within and outside the valid range | Accepts valid values, shows error for out-of-range | Numerical validation succeeded.                                       | Pass      |
| FT-03        | Content Generation (e.g., blog, resume, design idea)    | Provide complete inputs and click "Generate"     | Correct content is generated based on input        | Content generated matching prompt context perfectly.                  | Pass      |
| FT-04        | API Connection Check                                    | Check if API key is correct and model responds   | API responds successfully                          | API connected successfully with HTTP 200 OK.                          | Pass      |

|              |                                    |                                              |                                       |                                                        |      |
|--------------|------------------------------------|----------------------------------------------|---------------------------------------|--------------------------------------------------------|------|
| <b>PT-01</b> | Response Time Test                 | Use a timer to check content generation time | Should be under 3 seconds             | Average response time recorded at 1.6s.                | Pass |
| <b>PT-02</b> | API Speed Test                     | Send multiple API calls at the same time     | API should not slow down              | API maintained stable speed under 50 CCU load.         | Pass |
| <b>PT-03</b> | File Upload Load Test (e.g., PDFs) | Upload multiple PDFs and check processing    | Should work smoothly without crashing | Processed test PDFs successfully without memory leaks. | Pass |
